

## Unit 2. JavaScript Objects

---

Get the HTML file from 128.1.32.100/juanra

1. Using JavaScript:
  - a. Use `querySelectorAll` function at least once in your code. **(1,5 pt)**
  - b. Add a `img` element in the last container (`div`) **(1,5 pt)**
  - c. Show a message with the numbers of childs of the form. **(1,5 pt)**
2. By pressing button 1:
  - a. If the input text is empty: show a error message in red at the right of the input. (you can create what you think necessary) **(2 pt)**
3. By pressing button 2:
  - a. Create a new button at its right with the following functionality: **(1,5 pt)**
    - i. Include in the html the given css using the tag `<style>`. You can find it in 128.1.32.100/juanra **(1,5 pt)**

Extra point (only if you have time to finish it completely): Create the part 1 html structure using only javascript.

<b>NOTE: Upload the JS file to Moodle</b>
